**Inner-Balance
Wellness
Presents**

(ONDAMED: Latin for Wave Medicine)

**ONDAMED comes to St. Louis at
Inner-Balance Wellness
JULY 1, 2009!**

It is estimated that the average adult human has approximately 50 to 75 trillion cells. All healing that takes place in your body is accomplished by you and a matrix of chemical and electromagnetic processes that are amazingly intelligent and that work together to do this healing at speeds that can accommodate instantaneous communication between these trillions of cells.

- ONDAMED is based on the principal of electro-magnetic induction. ONDAMED produces a highly focused pulsed electromagnetic field that penetrates deep into a target region of the body to painlessly stimulate tissues and “jump-start” cellular activities which in turn jump starts healing.
- This unique technology locates underlying dysfunction as it simultaneously provides a therapeutic stimulus for each patient. ONDAMED’s specific pulsed electromagnetic fields used in combination with Pulse Bio-feedback “jump-starts” cellular repair and regeneration.
- ONDAMED complements other treatments, such as pharmaceuticals, homeopathic remedies, nutritional supplements and other therapeutic modalities: patients respond faster and the effects are longer lasting.

A better way...

because ONDAMED’s technology and methodology has been shown to be the “missing piece” in facilitating your body’s own blocked latent healing power. And, there are no known side-effects. Each Ondamed session is unique to each patient and is independent of prior sessions. Therapy applications depend on the individual patient’s conditions and findings. Each session runs approximately 30-45 minutes.

— What are the benefits? —

ONDAMED frequencies stimulate connective tissue also known as the extra cellular matrix. This matrix is a storage place for nutrients and toxins which are either absorbed by the cells or excreted into the bloodstream or lymph for removal from the body.

Stimulation of the extra cellular matrix:

- Enhances the release of toxins leading to improved detoxification
- Enhances the absorption of nutrients into the cells
- Reduces edema
- Stimulates cellular repair and regeneration
- Activates lymphatic drainage, thus improving the immune function
- Improves circulation of blood
- Reduces the harmful effects of geopathic and electromagnetic stress

Excitation with ONDAMED frequencies will:

- Balance metabolism
- Increase vitality
- Produce more positive moods
- Clear mental thought process
- Engender strong commitment to self-care

ONDAMED also provides specific protocols to:

- Stop smoking (usually in one session)
- Successfully deal with allergies
- Successfully deal with arthritis
- Successfully deal with neuropathy
- Successfully deal with almost any pain: fibromyalgia, osteoporosis, etc.

The ONDAMED is registered with the Food and Drug Administration as a Biofeedback Class II medical device, Cat. Neurology. In addition, ONDAMED® has been approved for use under the supervision of AAABEM, an Institutional Review Board, as safe for research or clinical testing as a non-invasive secondary therapeutic device in the treatment of pain, discomfort, or general malaise.
